

# Te Whare o Tiki

Co-existing problems  
knowledge and skills framework

This framework has been adapted by Dr Fraser Todd and the joint mental health and addiction workforce development centres based on the work of Dr Tom Flewett and the Co-existing Disorders Team of Capital and Coast DHB, Community Alcohol and Drug Service.

## **Te Whare o Tiki (The Healing House of Tiki)**

The name Te Whare o Tiki (The Healing House of Tiki) was given by Te Rau Matatini to the Co-existing problems joint workforce team for the Co-existing problems knowledge and skills framework.

The actual concept of the name originated from a line in a karakia often recited by Kaumatua Panataua Rangitaawa (Uncle Ben) a well-known Tainui kaumatua from Maniapoto who passed away in 2009. Uncle Ben would quote the whakapapa to Tiki and then recite the quote “E Tiki, hōmai te waiora ki a ahau” which Te Rau Matatini has translated this to mean ‘E Tiki grant me access to your house of healing powers’. The whakaaro around Te Whare o Tiki complements the themes of expressing transition, strength and hope portrayed in Te Ariari o te Oranga.

Published in May 2013 by Matua Raki and Te Pou.

The Werry Centre and ABACUS have contributed to the development of the framework and Te Rau Matatini supports the release of the framework to the mental health and addiction sector.

# Te Whare o Tiki

Te Whare o Tiki, the Co-existing problems (CEP) knowledge and skills framework, describes the knowledge and skills required by the mental health and addiction workforce to be able to effectively respond to the needs of people, and their families and whānau, with co-existing problems. The framework has been developed to align with the seven key principles of Te Ariari o te Oranga (Cultural Considerations, Well-being, Engagement, Motivation, Assessment, Management and Integrated Care) and is underpinned by the values and attitudes outlined in *Let's get real*. Each key principle encompasses a set of knowledge and skills with performance indicators at three levels of practice: Foundation, Capable and Enhanced.

## **Te Whare o Tiki complements and adds to existing frameworks including:**

- Te Ariari o te Oranga: The Assessment and Management of People with Co-existing Mental Health and Substance Use Problems (Todd 2010) – a clinical framework to assist health practitioners/clinicians working with co-existing problems
- *Let's get real* – a framework describing the knowledge, skills and attitudes required to deliver effective mental health and addiction services
- Real Skills Plus CAMHS – a framework describing the knowledge, skills and attitudes needed to work with infants, children and young people
- Real Skills Plus Seitapu – a framework describing the essential and desirable knowledge, skills and attitudes to engage with Pasifika peoples

- The professional competencies that mental health and addiction professionals are required to demonstrate for registration in nursing, social work, psychiatry, occupational therapy and psychology
- Addiction Intervention Competency Framework – the values, attitudes, knowledge and skills to assist people with addiction problems and register as an addiction professional
- Takarangi Competency Framework – a cultural competency framework for engaging with Māori

**The levels of practice can be broadly defined as:**

- **Foundation** – the essential knowledge and skills for everyone working in mental health and addiction services to be able to engage and respond effectively to people with CEP
- **Capable** – the knowledge and skills required of people working in mental health and addiction services to support people with less complex CEP needs. People with less complex needs can include those that:
  - are motivated to get support and attend treatment
  - have one of the co-existing problems relatively stable, well managed through existing treatment or less severe
  - do not need extra medication or treatment
  - do not need hospital-based treatment
  - have problems that have straight forward interactions to formulate
  - have good community and/or whānau supports.

- **Enhanced** – the knowledge and skills required of people working in mental health and addiction services to work effectively with people with more complex CEP needs. People with complex needs can include those that:
  - struggle to comply with treatment, including not taking medication as prescribed
  - are currently affected by both mental health and substance use disorders
  - have no apparent community or whānau support
  - have current legal issues such as imprisonment
  - have physical health problems, including chronic pain or a history of brain injuries
  - have an intellectual disability
  - have multiple social stresses such as homeless, relationship problems or children in care.

These levels have been structured to recognise the requirements of different workplaces and roles within the mental health and addiction sector from Support Worker to Specialist CEP Practitioner/Clinician. The levels are stepped and depending on the needs of the workplace and/or their role a worker can move from Foundation to Capable, and Enhanced, using the performance indicators to identify areas to be addressed through training and supervision.

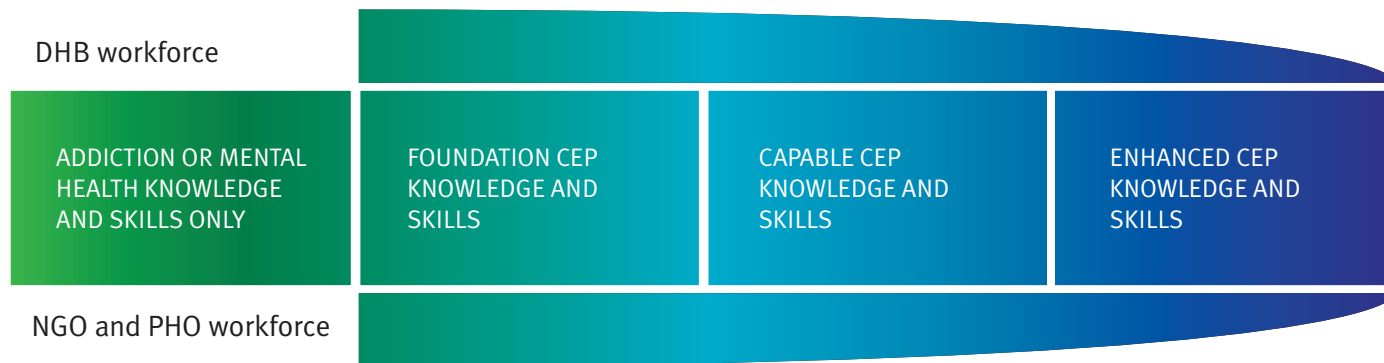

Each level has a clear set of performance indicators for each area of knowledge and skills that outline what a worker needs to know or demonstrate to show that they have achieved that level of capability. Workers are able to self-rate their level of relevant knowledge and/or ability to demonstrate that particular area of knowledge and skill.

Using the framework many workers will discover that they have a mixture of Foundation, Capable and Enhanced levels of knowledge and skills. Depending on the needs of their workplace and their specific roles they may need to work towards developing more consistent levels of Foundation, Capable or Enhanced levels of knowledge and skills.

There is no expectation that all mental health and addiction workers will move along the continuum to become experts in delivering mental health and addiction care, rather there is the expectation that everyone will become able to identify and respond to CEP at a Foundation level through: screening, brief assessment, and treatment planning, collaboration and shared integrated care with other services.

Depending on their service delivery requirements workplaces can identify what proportion of their workforce will need to have or develop each level of CEP knowledge and skills. To better meet the needs of tangata whaiora many services may expect all workers to have both Foundation and Capable levels of CEP knowledge and skills in some of the seven key principle areas. It is suggested that all services will need to have or have access to workers that have Enhanced CEP knowledge and skills to support their colleagues as mentors and in an advisory capacity.

### Continuum for developing service responsiveness to people with CEP

# 1 CULTURAL CONSIDERATIONS

Consider the cultural needs and values of all tangata whaiora throughout the treatment process

Knowledge and Skills	Foundation Base knowledge and skills	Competent	Need development	
1.1 Minority Ethnicities and Cultures	<ul style="list-style-type: none"> <li>• Has knowledge of the values, beliefs and practices of minority ethnicities and cultures of people with co-existing problems, especially refugee, Youth and Lesbian, Gay, Bisexual, Transvestite and Transexual (LGBT) cultures</li> <li>• Has knowledge of the prevalence of substance use, gambling and mental health problems in minority ethnicities and cultures</li> </ul>			
1.2 Māori	<ul style="list-style-type: none"> <li>• Demonstrates essential level <i>Let's get real</i>-Real Skill: Working with Māori</li> </ul>			
1.3 Pasifika	<ul style="list-style-type: none"> <li>• Demonstrates essential level Real Skills Plus Seitapu</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates the integration of knowledge of the cultural background, beliefs, values and practices of people with less complex co-existing problems</li> <li>• Has knowledge of the prevalence of co-existing problems in minority ethnicities and cultures</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the integration of knowledge of the cultural background, beliefs, values and practices of people with complex co-existing problems</li> <li>• Has knowledge of strategies used to reduce the prevalence of co-existing problems in minority ethnicities and cultures</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates the integration of knowledge and skills for working with Māori with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates skills for working with Māori with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates the integration of knowledge and skills for working with Pasifika people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates skills for working with Pasifika people with complex co-existing problems</li> </ul>		

## 2

### WELL-BEING & RECOVERY

*Consider problems as barriers to well-being and see well-being as the key recovery outcome rather than the absence of dysfunction*

Knowledge and Skills	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>2.1 Person-focused Care</b>	<ul style="list-style-type: none"> <li>Has knowledge of principles of holistic, person-focused care</li> </ul>			
<b>2.2 Wellbeing-orientated Care</b>	<ul style="list-style-type: none"> <li>Has knowledge of and uses ‘wellbeing’ concepts to support people with co-existing problems</li> </ul>			
<b>2.3 Supporting Recovery</b>	<ul style="list-style-type: none"> <li>Has knowledge of recovery concepts relevant to people with substance use, gambling and mental health problems</li> <li>Acknowledges and works with people to determine and define their own recovery processes and goals</li> <li>Advocates for recovery approaches</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates the use of holistic person-focused concepts (e.g. wellbeing) to integrate care for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the use of holistic person-focused concepts to integrate care for people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates the ability to support people with less complex co-existing problems to identify wellbeing goals</li> <li>• Demonstrates assessment of wellbeing for people with less complex co-existing problems</li> <li>• Demonstrates the use of simple wellbeing interventions for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the ability to identify and acknowledge wellbeing for people with complex co-existing problems</li> <li>• Demonstrates the use of advanced wellbeing interventions for people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates support for people with less complex co-existing problems to achieve their stated recovery goals</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the ability to collaborate with people with complex co-existing problems to achieve recovery</li> </ul>		

### 3 **ENGAGEMENT** *Actively incorporate strategies to increase and maintain engagement*

Knowledge and Skills	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>3.1 Active engagement strategies</b>	<ul style="list-style-type: none"> <li>• Has knowledge of the principles of engagement</li> <li>• Demonstrates the ability to develop rapport with people with co-existing problems</li> <li>• Has knowledge of basic strategies to enhance engagement with people with co-existing problems</li> <li>• Can identify and describe key barriers to engagement</li> <li>• Demonstrates the use of supports to enhance engagement</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates the ability to develop therapeutic relationships with people with less complex co-existing problems</li> <li>• Demonstrates awareness of the impact of service level factors that impact on engagement</li> <li>• Demonstrates the use of motivational approaches to enhance engagement for people with less complex needs</li> <li>• Demonstrates the use of skills to enhance engagement for people with less complex needs</li> <li>• Demonstrates the use of skills to reduce common barriers to early engagement for people with less complex co-existing problems e.g. hostility, anger, emotional dysregulation, depression, anxiety hyperarousal, avoidant coping</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the ability to develop therapeutic relationships with people with complex co-existing problems</li> <li>• Demonstrates the ability to address service level factors that impact on engagement</li> <li>• Demonstrates the use of motivational approaches to enhance engagement for people with more complex needs</li> <li>• Demonstrates the use of a range of strategies to enhance engagement e.g. cognitive mapping, use of peer support, community reinforcement</li> <li>• Demonstrates the use of skills to reduce common barriers to early engagement for people with complex co-existing problems e.g. hostility, anger, emotional dysregulation, depression, anxiety, hyperarousal, avoidant coping</li> </ul>		

## 4 MOTIVATION

*Actively incorporate strategies to enhance motivation*

<b>Knowledge and Skills</b>	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>4.1 Assesses stage and level of motivation</b>	<ul style="list-style-type: none"> <li>• Demonstrates the ability to evaluate people’s motivation to change and their goals in relation to mental health, substance use, gambling and other problematic issues</li> <li>• Has knowledge of the stages of change theory</li> </ul>			
<b>4.2 Strategies to enhance motivation</b>	<ul style="list-style-type: none"> <li>• Has knowledge of the principles of motivation enhancement</li> <li>• Demonstrates the ability to match treatment planning to people’s apparent stage of change for each problematic issue</li> <li>• Demonstrates the ability to work within the spirit of motivational interviewing and use basic motivational strategies to support internalisation of motivation</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates skills at assessing motivation using stage of change and self-determination theories with people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates skills at assessing motivation using stage of change and self-determination theories with people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates the use of a range of strategies to enhance motivation for people with less complex co-existing problems, e.g. basic motivational interviewing skills, fostering autonomy supportive environments</li> <li>• Demonstrates the use of interventions matched to people's stage of change for each problematic issue</li> <li>• Demonstrates the use of peer and whānau support to enhance motivation for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates advanced motivational enhancement skills adapted for people with complex co-existing problems</li> <li>• Demonstrates advanced skills to enhance self-determination and internalisation of motivation e.g. fostering autonomy-supportive environments</li> <li>• Demonstrates advanced skills to enhance transfer of goals into action e.g. fostering implementation and action intention</li> <li>• Demonstrates the use of peer and whānau support to enhance motivation for people with complex needs</li> </ul>		

## 5 ASSESSMENT

*Screen all tangata whaiora presenting to mental health and addiction services for co-existing problems and ensure that a comprehensive assessment and problem formulation is carried out when co-existing problems are identified*

<b>Knowledge and Skills</b>	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>5.1 Screening for:</b>  a) <b>substance use disorders</b> b) <b>mental health disorders</b> c) <b>problem gambling</b>	<ul style="list-style-type: none"> <li>Has knowledge of and is able to use common screening tools</li> </ul>			
<b>5.2 Brief Interventions</b>	<ul style="list-style-type: none"> <li>Has knowledge of brief interventions</li> <li>Demonstrates the ability to use simple brief intervention strategies with people with co-existing problems</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates skills in the use and interpretation of common screening tools for people with less complex co-existing problems</li> <li>• Demonstrates the ability to use the outcomes of screening in support and treatment planning for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates advanced screening skills for people with complex co-existing problems</li> <li>• Demonstrates the ability to use the outcomes of screening in support and treatment planning for people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates skills in the use of brief interventions with people who have less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates skills in utilising brief interventions in a variety of settings with people who have complex co-existing problems</li> </ul>		

<b>Knowledge and Skills</b>	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>5.3 Mental health, substance use and gambling assessment</b>	<ul style="list-style-type: none"> <li>• Has knowledge of mental health, substance use and gambling disorders</li> <li>• Demonstrates the ability to briefly assess recent and lifetime mental health symptoms/problems</li> <li>• Demonstrates the ability to briefly assess recent and lifetime substance use (patterns of use and previous treatment)</li> <li>• Demonstrates the ability to briefly assess recent and lifetime gambling behaviour (patterns of gambling and previous treatment)</li> </ul>			
<b>5.4 Assessment of impact of substance use, gambling and mental health disorders on children, family and whānau</b>	<ul style="list-style-type: none"> <li>• Has knowledge of the possible impacts of mental health, substance use and gambling disorders on children, family and whānau</li> <li>• Has knowledge of COPMIA (Children of Parents with a Mental Illness and Addiction) and the resources and supports for children, family and whānau</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Has knowledge of DSM-IV/V and or ICD-10 criteria for mental health, substance use disorders (including substance-induced states) and pathological gambling</li> <li>• Demonstrates the ability to comprehensively assess mental health, substance use and gambling history in the context of social, psychological and physical functioning across the life span</li> </ul>			<ul style="list-style-type: none"> <li>• Has knowledge of and demonstrates the use of DSM-IV/V and or ICD-10 criteria for assessing mental health, substance use disorders (including substance-induced states) and Pathological Gambling</li> <li>• Demonstrates the integration of knowledge and practical application within the comprehensive assessment of complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates the ability to assess the consequences of non-complex substance use, gambling and mental health disorders for children, family and whānau</li> <li>• Demonstrates the ability to coordinate support for children family and whānau affected by less complex co-existing mental health and addiction problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the ability to assess the consequences of complex substance use, gambling and mental health disorders for children, family and whānau</li> <li>• Demonstrates the ability to coordinate and provide support for children, family and whānau affected by co-existing complex mental health and addiction problems</li> </ul>		

Knowledge and Skills	Foundation Base knowledge and skills	Competent	Need development	
5.5 Mental state examination (MSE)	<ul style="list-style-type: none"> <li>• Has knowledge of the mental state examination processes</li> </ul>			
5.6 Risk management	<ul style="list-style-type: none"> <li>• Has knowledge of risk assessment and management principles</li> <li>• Demonstrates support for risk management strategies for people with co-existing problems</li> </ul>			
5.7 Assessment (and synthesis) of relationships between substance use disorders, problem gambling and other mental health disorders	<ul style="list-style-type: none"> <li>• Has knowledge of potential interactions between substance use, gambling and mental health symptoms and disorders</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates the use of mental state examinations for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the use of mental state examinations for people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates skills in risk assessment and management for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates skills in risk assessment and management for people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates the knowledge and synthesis of the potential interactions between substance use, gambling and mental health symptoms and disorders in written assessments, intervention planning and clinical records for people with less complex co-existing problems</li> <li>• Demonstrates the ability to formulate the needs of people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the knowledge and synthesis of the potential interactions between substance use, gambling and mental health symptoms and disorders in written reports for people with complex co-existing problems</li> <li>• Demonstrates knowledge of common underlying/latent causal and maintaining factors e.g. impulsivity, attentional control, negative emotionality, avoidant coping</li> <li>• Demonstrates the ability to formulate the needs of people with complex co-existing problems</li> </ul>		

<b>Knowledge and Skills</b>	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>5.8 Monitoring and testing of substances, including alcohol and medications</b>	<ul style="list-style-type: none"> <li>• Has knowledge of common substance and medication testing procedures and laboratory investigations</li> <li>• Has knowledge of common blood and urine tests used with people with co-existing disorders</li> </ul>			
<b>5.9 Evaluation of ‘stages of change’ in relation to problematic issues and the application of the model to treatment planning</b>	<ul style="list-style-type: none"> <li>• Has knowledge of importance of people’s motivation to change and their goals in relation to each problematic issue</li> <li>• Has knowledge of the benefits of matching interventions to people’s apparent stage of change for each problematic issue</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates the use of common substance and medication testing procedures and laboratory investigations</li> <li>• Has a comprehensive knowledge of substance and medication testing methods</li> <li>• Demonstrates the use of blood and urine testing to enhance engagement, assessment, treatment and safety of people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the use and interpretation of common substance and medication testing procedures and laboratory investigations</li> <li>• Demonstrates the application of substance and medication testing methods</li> <li>• Demonstrates the use and interpretation of blood and urine testing to enhance engagement, assessment, treatment and safety of people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates skills in using the stages of change theory with people with less complex co-existing problems</li> <li>• Demonstrates the use of interventions matched to people’s apparent stage of change for each problematic issue</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates skills in using the stages of change theory with people with complex co-existing problems</li> </ul>		

## 6 MANAGEMENT

*Use clinical case management to coordinate and deliver multiple interventions appropriate to the phase of treatment*

Knowledge and Skills	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>6.1 Integrated treatment approach for co-existing problems</b>	<ul style="list-style-type: none"> <li>• Has knowledge of the range of health, psychological and social issues that can also be co-existing problems</li> <li>• Has knowledge of the benefits of coordinated treatment for people with co-existing problems</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates the ability to provide appropriate management of people with less complex co-existing problems including: integration of specific treatments, working within a multidisciplinary team, interagency collaboration and referral to support their recovery and wellness goals</li> <li>• Has knowledge of the interaction of less complex co-existing problems</li> <li>• Has knowledge of potential interactions between substances and or medications</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates appropriate management of people with complex co-existing problems including: integration of specific treatments, working within a multidisciplinary team, interagency collaboration and referral to support their recovery and wellness goals</li> <li>• Has knowledge of the interaction of complex co-existing problems</li> <li>• Provides advice about potential interactions between substances and/or medications</li> </ul>		

<b>Knowledge and Skills</b>	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>6.2 Relapse prevention (RP) strategies</b>	<ul style="list-style-type: none"> <li>• Has knowledge of how to identify early warning signs and support relapse prevention plans</li> <li>• Has knowledge of common relapse prevention concepts and strategies</li> </ul>			
<b>6.3 Harm reduction and self harm reduction strategies</b>	<ul style="list-style-type: none"> <li>• Has knowledge of common harm reduction strategies for people with mental health, substance use and gambling problems and their families and whānau</li> <li>• Has knowledge of the reasons to use harm reduction strategies</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates the development and use of relapse prevention strategies addressing early warning signs and triggers for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the use of individual and systemic talking therapies for people with complex co-existing problems</li> <li>• Demonstrates the development and management of relapse prevention strategies addressing early warning signs and triggers for people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates the use of harm reduction strategies for people with less complex co-existing problems and their families and whānau</li> <li>• Demonstrates the implementation of service harm reduction policies and procedures</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the use of harm reduction strategies for people with complex co-existing problems and their families and whānau</li> <li>• Has knowledge of national and international harm reduction debates and policies</li> <li>• Has knowledge of relevant public health harm reduction approaches</li> </ul>		

<b>Knowledge and Skills</b>	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>6.4 Mental health or co-existing problem crisis</b>	<ul style="list-style-type: none"> <li>• Has knowledge of and can recognise signs and symptoms of mental health and or co-existing problems crisis</li> <li>• Has knowledge of who and when to contact in a mental health and/or co-existing problems crisis</li> <li>• Has knowledge of physical and substance use problems that resemble mental health crises</li> </ul>			
<b>6.5 Assessment and management of intoxicated states</b>	<ul style="list-style-type: none"> <li>• Has knowledge of and can recognise the signs of intoxication of commonly used substances</li> <li>• Has knowledge of physical and mental health problems that resemble intoxication</li> </ul>			
<b>6.6 Management of acute and protracted withdrawal states</b>	<ul style="list-style-type: none"> <li>• Has knowledge of and can recognise the signs and symptoms of substance withdrawal and the potential impact on physical and mental health</li> <li>• Has knowledge of who and when to contact for withdrawal management</li> <li>• Has knowledge of who and when to contact for outpatient detoxification</li> <li>• Has knowledge of the signs and symptoms of protracted substance withdrawal</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates skills in the assessment and short term management, including referral, of people in a mental health or less complex co-existing problems crisis</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates clinical skills in the assessment and management of people in mental health or co-existing problems crisis</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates skills in the recognition and management of intoxication for common substances</li> <li>• Has knowledge of the signs of use of a wide range of substances</li> <li>• Has knowledge of the interplay between intoxication and the symptoms of less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates skills in the management of intoxication from a wide range of substances</li> <li>• Demonstrates knowledge and management of the interplay between intoxication and the symptoms of co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates skills in the assessment and management, including referral, of acute and protracted substance withdrawal for people with less complex co-existing problems</li> <li>• Demonstrates the use of detoxification protocols</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates withdrawal management skills, within professional scope of practice, for people with complex co-existing problems engaged in inpatient and outpatient detoxification</li> </ul>		

<b>Knowledge and Skills</b>	<b>Foundation</b> Base knowledge and skills	Competent	Need development	
<b>6.7 Pharmacological treatments (medications) for mental health and substance use disorders</b>	<ul style="list-style-type: none"> <li>• Has knowledge of medications used in the treatment of mental health disorders</li> <li>• Has knowledge of medications used in the treatment of substance use disorders</li> </ul>			
<b>6.8 Psychological treatments including talking therapies such as Motivational Interviewing, Cognitive Behavioural Therapy (CBT), Dialectical Behavioural Therapy (DBT), group, systemic and family therapies</b>	<ul style="list-style-type: none"> <li>• Has knowledge of talking therapies used in addiction/ AOD, problem gambling, and mental health treatment</li> </ul>			

<b>Capable</b> Knowledge and skills to support people with less complex needs	Competent	Need development	<b>Enhanced</b> Knowledge and skills to support people with complex needs	Competent	Need development
<ul style="list-style-type: none"> <li>• Demonstrates awareness of the interactions between pharmacological treatments and mental health and substance use disorders</li> <li>• Demonstrates the ability to provide basic information about medications, side effects and interactions with substances to people with less complex co-existing problems and to know when to refer to the relevant medical practitioner/prescriber</li> <li>• Demonstrates support for people with co-existing problems to ask questions about the need, use and side effects of medications</li> <li>• Demonstrates the ability to provide advocacy and support around pharmacotherapeutic interventions for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates in-depth knowledge of interactions between pharmacological treatments and mental health and substance use disorders</li> <li>• Demonstrates the ability to give advice to people with complex co-existing problems about interactions between pharmacological interventions and to know when to refer to the relevant medical practitioner/prescriber</li> <li>• Demonstrates the ability to monitor, refer and advocate for supportive pharmacotherapy for people with complex co-existing problems</li> </ul>		
<ul style="list-style-type: none"> <li>• Demonstrates the use of systemic and individual talking therapies for people with less complex co-existing problems</li> </ul>			<ul style="list-style-type: none"> <li>• Demonstrates the use of individual and systemic talking therapies for people with complex co-existing problems</li> </ul>
